★ — work instructions following ★ as many **more** times as indicated in addition to the first time.

† to † — work all instructions from first † to second † **as many** times as specified.

( ) or **[ ]** — work enclosed instructions **as many** times as specified by the number immediately following **or** work all enclosed instructions in the stitch or space indicated **or** contains explanatory remarks.

colon (:) — the number(s) given after a colon at the end of a row or round denote(s) the number of stitches and/or spaces you should have on that row or round.

GAUGE

The following instructions are written for bedspread weight cotton (size 10). For your convenience, instructions for a gauge swatch have been provided in each pattern. However, gauge is not of great importance; your Edgings may be a little larger or smaller without changing the overall effect.

BEFORE YOU BEGIN

If you plan to attach the Edging to a washable item (towels, linens, clothes, etc.), we suggest laundering the item before taking any measurements to determine the desired length of the Edging.

MATERIALS

Bedspread Weight Cotton Thread (size 10)
Steel crochet hook, size 6 (1.80 mm) **or** size needed for gauge

MULTIPLES

The multiple plus the number of chains needed for the beginning chain are given with some of the Edgings. These prove invaluable when determining the exact number of stitches required for the first row.

An example is #6, page 8, which is a multiple of 6 + 5 chs. The beginning chain would require 11, 17, 23, 29, 35, etc. chains, or any number divisible by 6 plus an additional 5 chains.

Some Edgings are worked for a multiple of rows to enable the Trim on the end of rows to work. An example is #4, page 6, which is worked for a multiple of 4 + 3 rows. The pattern would require 11, 15, 19, 23, etc. rows, or any number divisible by 4 plus an additional 3 rows.

JOINING WITH SC

When instructed to join with sc, begin with a slip knot on hook. Insert hook in stitch or space indicated, YO and pull up a loop, YO and draw through both loops on hook.

BACK RIDGE

Work only in loops indicated by arrows ***(Fig. 1)***.

WASHING AND BLOCKING

For a more professional look, pieces should be washed and blocked. Using a mild detergent and warm water and being careful not to rub, twist, or wring, gently squeeze suds through the piece. Rinse several times in cool, clear water. Roll piece in a clean terry towel and gently press out the excess moisture. Lay piece on a flat surface and shape to proper size; where needed, pin in place using rust-proof pins. Allow to dry **completely**.
